Złącze USB - C**Ochrona ESD****Przetwornica step-down DC/DC**

W nocy aplikacyjnej konwertera Step-down jest jeden rezystor o wartości 0.33, jednak w szeregu E24 nie ma takich, więc najprościej połączyć 3 o wartości 1 równolegle

**Listwy Goldpin na dla pinów FTDI232H**

UWAGA: w nocy zalecane jest dodanie filtra LC dla pinu 47

UWAGA: uwzględniając dodatkowo pojemność PCB = 5 pF, kondensatory powinny mieć wartość ok. 26 pF
